GENERAL INFORMATION

All electrical connections must be in accordance with all ordinances, Local and the U.S. National Electrical Codes (NEC). These fixtures are intended for mounting to a standard 4" metal octagon outlet box. The box must be directly supported by the building structure and U.L. Recognized.

STEP BY STEP INSTRUCTIONS

Before starting your installation disconnect the Power by turning off the Circuit Breaker or by removing the fuse at the fuse box. Just turning the light off at the light switch is not sufficient to prevent electrical shock.

1

MOUNT CROSSBAR

If there is an existing fixture remove it. Expose the supply wires from the j-box. Insert the supplied long screws through the holes in the crossbar and secure tightly to the crossbar with the provided hex nuts. This will prevent the long screws from rotating when securing the fixture to the crossbar in step 4. Note the length of the long screws into the crossbar may be adjusted as needed. Mount the crossbar to the J-Box with the supplied screws.

2

ASSEMBLING INSTRUCTION

Using the supplied rods, determine the desired hanging height. Secure the rods to the fixture body and canopy. Carefully pass the wires through the rods and canopy.

3

CONNECT THE WIRES

Connect the black supply wire to the black fixture wire. Secure with the supplied wire nuts. Connect the white supply wire to the white fixture wire. Secure with the supplied wire nuts. Attach the green J-Box wire around green hexagonal head screw or connect it to the green supply grounding wire of the fixture. Secure all wires with electrical tape (not supplied). Tuck all wires carefully into the J-Box.

4

ATTACH THE FIXTURE TO THE CROSSBAR

Align the canopy to the long screws and secure with the supplied decorative cap nuts.

5

INSERT THE BULB

Insert the bulb.
DO NOT EXCEED THE MAXIMUM WATTAGE AS STATED ON THE WARNING LABEL

6

RESTORE THE ELECTRICITY AND CHECK THE OPERATION OF YOUR NEW ACCESS LIGHTING FIXTURE
