TURTLE AND WILDLIFE FRIENDLY LIGHTING

Turtle-friendly lighting aims to minimize the ecological impact that traditional lighting can have on turtles and wildlife, especially near oceans and beaches. Sea turtles who come to the shore to lay eggs may get disoriented by artificial light, which can keep them from nesting. For those that do nest, their hatchlings may be drawn toward man-made lighting sources instead of the instinctively attractive starlight or moonlight reflecting off the water.

Generation Lighting offers a variety of fixtures specifically designed to prevent sea turtles from being distracted by the light and coming inland. Multiple styles and finishes available to suit any application.

CYLINDERS

The referenced products listed here meet all the criteria for Wildlife Lighting and are approved when installed and used correctly to meet minimal lighting standards. Per the FWC sea turtle lighting guidelines, approved wall mount fixtures must be downward directed with a maximum mounting height of 8 feet from the floor. These luminaires are recommended for use in areas where artificial lighting is needed adjacent to ecologically sensitive areas, sea turtle nesting beaches, migratory corridors, and Dark Sky Friendly communities.

BENEFITS OF GENERATION LIGHTING WILDLIFE FRIENDLY FIXTURES:

- Medium PAR20 7w Max. Bulb included with each wildlife friendly fixture.
- Dark sky compliant. Designed to emit no light above the 90° horizontal plane.
- Wet location listed.
- Title 24 compliant.

WILDLIFE LAMPING

Item Number	S9188
Dimensions	D: 2.5" L: 3.25"
Watts	7
Hours Rated	25000
Lumens	340
Efficacy	49 Lumens/watt.
Beam Spread	40°
Dimmable	Non-Dimmable
Lamp Type	PAR
Technology	LED

Finish: Unfinished Ceramic [-714/T]

IMPORTANT TO KEEP IN MIND...

- Wall mounts must be downward directed with a maximum mounting height of 8 feet from the floor.
- Not for use above the first habitable floor when located on the shore perpendicular or beachside of a structure.
- Additional shielding may be necessary if directly or indirectly visible from the beach.
- This particular certification is specific to the Florida Fish and Wildlife Conservation Commission. As part of project scoping, please check local ordinances.
